DETAILED ACTION
INFORMATION DISCLOSURE STATEMENTS

Several citations are lined through on the enclosed PTO Form 1449s due to a lack of a date of publication as required. It is noted that the Office actions also are not published documents.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 3-6 are rejected under 35 U.S.C. 102(e)(2) as being clearly anticipated by Innis et al. (P/N 6,316,253).

Innis et al. disclose the computerized usage of a Smith-Waterman sequence alignment methodology with a scoring table utilized therein in column 7, lines 13-40. The scoring table therein cited is well known in the art as utilizing two axes for defining nucleotide matches such as 100% at specific nucleotides. This is reasonably interpreted as indicating a segment on such a table having 100% similarity which is not less than a qualified ratio as required in instant claim 1.

Art Unit: 1631

CLAIM OBJECTION

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.
